

Make it Easy for Your Customers, Team or Associates to Reach You in Any Country

- Change your 'ring to' number online 24/7 in real time. Example: forward your calls to your mobile in the daytime and landline at night. Or, from Hong Kong to the UK by simply logging in and changing the 'ring to' number.
- Manage your account online. Login and make changes to account preferences, 24/7.
- Top tier public network carriers used to carry call traffic assuring high quality calls. Not VoIP.
- Gain a presence or business identity in any of the serviced countries.
- Economical monthly fee.
- No minimum usage requirement and no term commitment.
- No account cancellation or termination fees.
- Makes no changes to any service you have now.

Automatically Forward Calls to Any Country

We offer country specific toll free numbers in 45 countries.

Gain a business identity and presence without a physical location.

You can now have your own private toll free telephone number that will automatically redirect calls to your mobile or landline telephone number located in any country.

This means that we can provide you with a country specific toll free number. For example, if you have callers in the UK, we can supply you with a 'UK' toll free number. If your callers were in France, you could order a France toll free number.

Of course, if your callers are in the U.S., you would order a U.S. toll free number.

Example 1:

A cruise line based in Brazil publishes a U.S. toll free number as part of their advertising in the U.S. media. A cruise traveler located in the U.S. dials the toll free number and instantly connects to the cruise line offices located in Brazil.

Example 2:

A marketing company in the U.S. wants to make it easy for customers located in France to place orders for products. Customers in France dial a French toll free number and connect instantly to the U.S. office.

CallMe 800 is an excellent way for international companies to increase sales while making themselves available to the world's biggest markets. Having a toll free number makes even the smallest off-shore enterprise appear to be larger and more at-
