## Follow Me International

### Automatically Forward Calls to Any Country

Gain a business identity and presence without a physical location.

You can now have your own private toll free telephone number that will automatically redirect calls to your telephone number located in any country. Toll free numbers in many countries.

This means that we can provide you with a country specific toll free number. For example, if you have callers in the UK, we can supply you with a "UK" toll free number. If your callers were in France, you could receive a France toll free number.

Of course, if your callers are in the U.S., you would order a U.S. toll free number.

#### **Example 1:**

A cruise line based in Brazil publishes a U.S. toll free number as part of their advertising in the U.S. media. A cruise traveler located in the U.S. dials the toll free number and instantly connects to the cruise line offices located in Brazil.

#### **Example 2:**

A marketing company in the U.S. wants to make it easy for its customers located in France to place orders for its products. Customers in France dial a French toll free number and connect instantly to the U.S. office.

Follow Me International is an excellent way for international companies to increase sales while making themselves available to the world's biggest markets. Having a toll free number makes even the smallest offshore enterprise appear to be larger and more attractive to consumers.
