

Conference Call Services

Treating conference call services as a commodity is a common practice because it's the duty of all companies to seek out and employ the services required at the best possible rates so as to not overpay. This can be a daunting but necessary task due to the numerous offerings and price structures available today in the marketplace.

AIT provides equal or better service quality than the other top carriers in the U.S. but at a fraction of the cost.

For example, AIT's reservationless conference call service provides business class features but at a major discount compared to carriers such as AT&T, Verizon, CenturyLink, Frontier and Fairpoint.

Features included with AIT's conference call services:

- 24 hour operator assistance
- Toll Free bridge access from 60 countries for the International Plan
- No activation fee, no monthly fees, no monthly minimum usage requirements, no contracts, no long term commitments
- Complete array of keypad commands
- Superb quality International Toll Free ITFS network
- Free MP3 session downloads of any recorded calls
- Dial-out option to 270 countries
- Automatic attendance reports sent to moderator
- Conference Call Manager
- Outlook Integration Feature
- Event Self Registration Feature

Our customers that have replaced their old conference call service with an AIT plan report improved customer service, excellent 24/7 operator assistance when needed and an overall enhanced user experience, all of this at a new and significantly lower cost. We welcome the opportunity to discuss your requirements at any time.
