

Conference Calling—the indispensable collaboration tool

100+ country access numbers

- No matter where in the world your participants are located, you can easily host or attend a group conference call
- Many enterprises that are global in scope find conference calling a very valuable business tool and simply could not do business without it
- Conference calling is the most economical collaboration tool because it's instant and requires no travel
- It's perfect for teams or group meetings that need to share and collaborate no matter where in the world they may be located
- From 2 to 250 attendees can meet by phone, 24/7
- Host meetings for attendees in your country or with any other country

Team Building & Collaboration

There are four main conference calling types: toll free and toll, international, and video/web.

Toll-free conference calling, enables all participants to dial a toll free number from their country providing ultimate convenience. And the call is free to the caller.

The International Conference Call plan offers toll-free access numbers accessible from 100+ countries.
